Lorsban*-4E

EPA Reg. No. 62719-220

EPA 24(c) Special Local Need Registration SLN ID-950013

For Distribution and Use Only in the State of Idaho

To Control Garden Symphylans Infesting Sugar Beets Grown for Seed

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Lorsban-4E before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Lorsban-4E according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban-4E .

Directions for Use

Use and Dosage Recommendations

Apply Lorsban*-4E insecticide in the fall as a pre-plant incorporated broadcast spray to protect sugar beets from garden symphylans during the following growing season. Apply at the rate of 2 quarts per acre using suitable power-operated ground application equipment. For best results, use a spray volume of at least 10 gallons of water per acre.

Precautions

- Lorsban-4E should not be tank mixed with other pesticides, surfactants, or fertilizer formulations unless prior use experience has shown that combination to be non-injurious under local conditions of use.
- Consult your cooperative agricultural extension service for additional information concerning garden symphylan control practices in your area.

Restrictions

- Apply only as a soil pre-plant incorporated treatment in the fall for protection of sugar beets grown the following year.
- Do not apply Lorsban-4E through any type of irrigation system for the use described in this supplemental labeling.
